HUONS GLOBAL

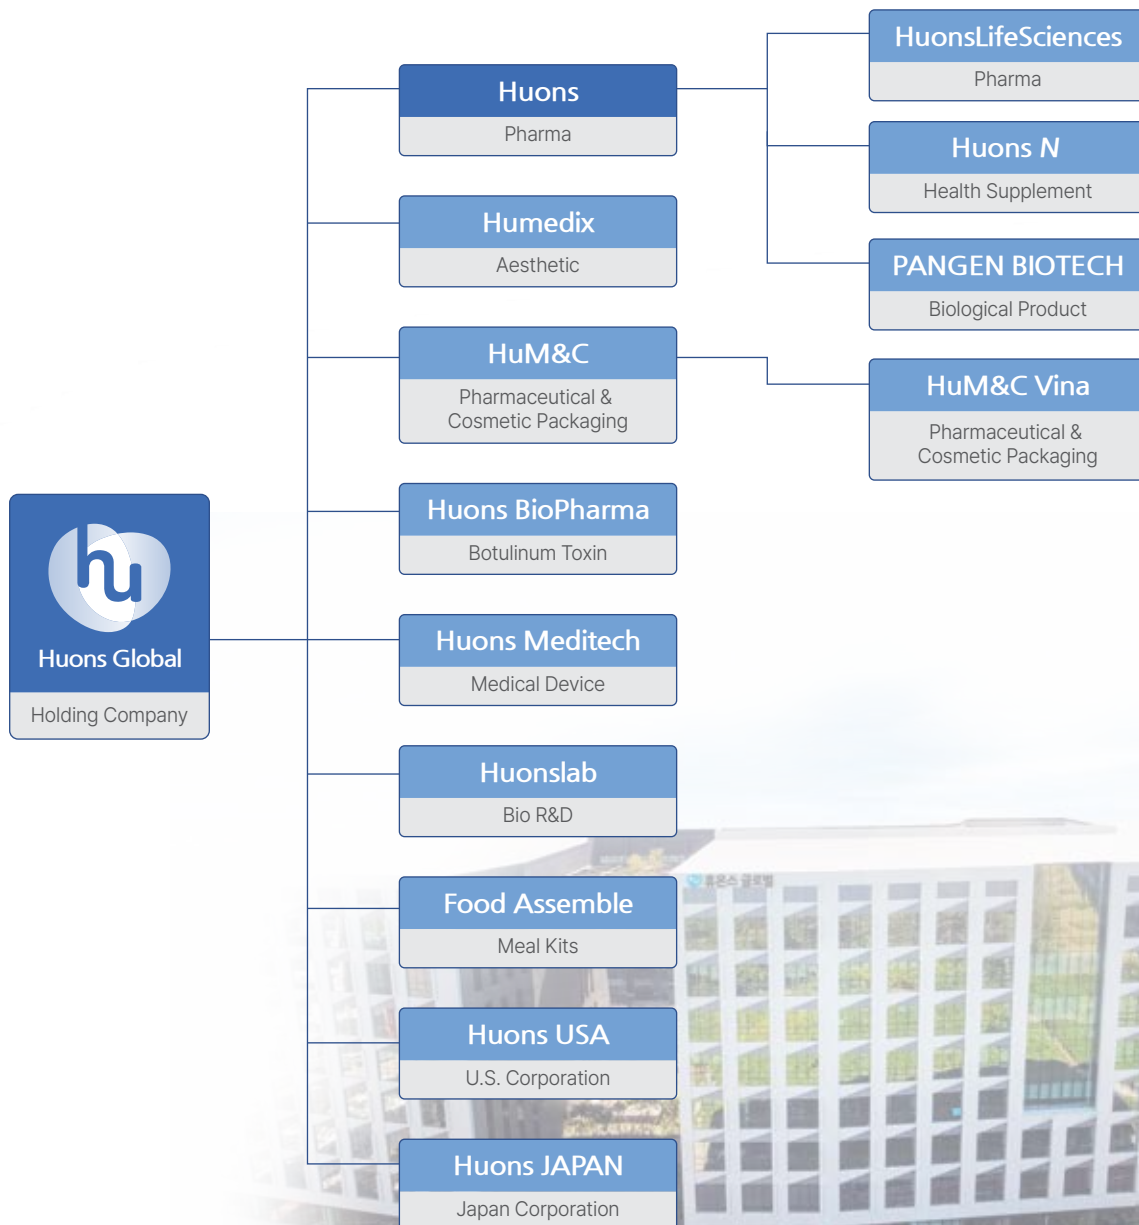

Huons Global Overview

Huons Global is the holding company of the Huons Group, a total-healthcare group whose business has expanded beyond pharmaceuticals into biopharmaceuticals, medical devices, health functional foods, health supplements, and cosmetics, serving both domestic and overseas markets. Centered around Huons Global, key subsidiaries such as Huons, Humedix, and Huons Biopharma operate as independent companies, creating synergy through their specialized expertise and close collaboration.

As the group's strategic control tower, Huons Global sets the overall direction of the business and supports sustainable growth and global expansion of each affiliate, while promoting long-term investment. Through this structure and the integrated R&D hub, the group continues to develop new pipelines and strive toward delivering innovative, high-quality healthcare solutions as a trusted and beloved global healthcare brand.

Total Healthcare Group

Growing fast with consistent profitability

Huons Overview

Huons has been manufacturing high-quality finished pharmaceutical products since 1965, and it pioneered the development of the first locally manufactured local anesthetics and plastic-ampoule injectable products in the Republic of Korea. This long-established technical foundation and accumulated know-how, together with continuous research and development efforts, enable the company to deliver products of the highest quality.

Over the years, Huons has strengthened its leadership in sterile manufacturing, producing injections and ophthalmic solutions through production facilities compliant with PIC/S GMP standards (MFDS, PMDA) and US FDA cGMP requirements. Leveraging these capabilities, the company offers a wide range of pharmaceutical products to both domestic and global markets and continues to expand its international presence.

World-class manufacturing facilities

Huons operates manufacturing facilities that comply with cGMP standards, ensuring the highest level of product quality and reliability. We continue to expand our CMO business by meeting the needs of leading pharmaceutical companies, and our advanced manufacturing capabilities have enabled us to obtain ANDA approval for injectable products.

Jecheon Plant 1 is equipped with substantial production capacity, including 234,934,000 units of injectables, 274,267,000 units of ophthalmic solutions, and 1,181,437,000 units of oral solid dosage forms per year.

Jecheon Plant 2, which received GMP approval in September 2023 and is now fully operational, has an annual capacity of 156,269,000 units of ophthalmic solutions. In addition, Huons is preparing new injectable manufacturing capacity at Plant 2. By the second half of 2025, the facility is expected to produce 53 million vials and 66 million cartridges annually.

Global R&D Center

In November 2024, Huons Group brought together all of its research organizations and equipment under one roof by inaugurating the Huons Dongam Research Center in Gwacheon. The decision to centralize R&D assets aims to concentrate research capabilities, enhance internal communication, and accelerate collaboration through shared personnel and projects, thereby generating powerful R&D synergies across the entire group.
